

ROSA WET-S5 Aflatoxin Quantitative Test for Feed & Grain

5
minutes

Product Overview

The **ROSA® WET®-S5 Aflatoxin Quantitative Test (AFQ-WETS5)** delivers rapid and accurate results using ROSA (Rapid One Step Assay) lateral flow technology. Water Extraction Technology eliminates ethanol and methanol using an extraction powder and water (e.g., bottled) to quickly and safely extract aflatoxin from the sample.

Benefits of AFQ-WETS5 Test Include:

- Range: 0 to 150 ppb
- Results in 5 minutes
- GIPSA Approval
- Elimination of ethanol and methanol solvents
- Negative samples may be disposed as normal waste
- Awarded 5 year GIPSA contract to monitor aflatoxin in grains

Run on the Charm EZ-M System:

- High volume output with batching using multiple quad incubators
- Standard curve built into reader reducing testing cost by eliminating end-user calibration
- Printable or downloadable results to any computer or LIMS system
- WETS5 strips detect multiple toxins from one sample

Commodities

GIPSA ^A Approved Commodities				
Barley	Brewer's Rice	Brown Rice	Corn	Corn Flour
Corn Germ Meal	Corn Grits	Corn Meal	Corn Screenings	Corn/Soy Blend
DDGS	Hominy	Oats	Popcorn	Rough Rice
Sorghum	Soybeans	Wheat		

^AUSDA - Grain Inspection, Packers and Stockyard Administration - Federal Grain Inspection Services

Simple Procedure

Add Sample.

Incubate.

Read results in less than 5 seconds!

For batch processing, incubate multiple strips simultaneously, then read results in the Charm EZ-M system.

Ordering Info

Order Codes	Each Kit Includes
LF-AFQ-WETS5-20K LF-AFQ-WETS5-100K LF-AFQ-WETS5-500K	Test Strips, Positive Control, Dilution Buffer
